

# REMINDER!

## ANNUAL BACKFLOW PREVENTION ASSEMBLY TESTING

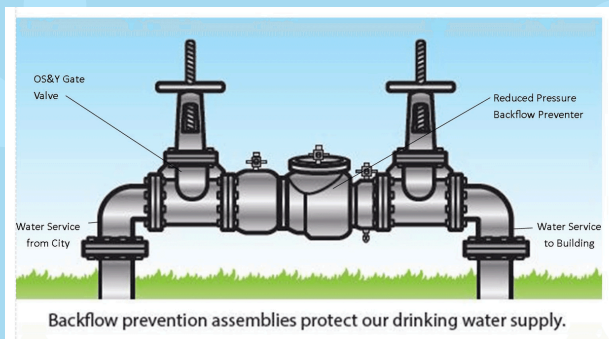

**DID YOU KNOW?** common hazards in and around your house can contaminate your drinking water as well as your neighbors?

These hazards are known as **cross-connections** and can result in contaminated water backflowing into your homes drinking water supply without you even knowing.

**Your in-ground irrigation system** is a cross-connection and requires your attention. In-ground landscape irrigation systems are the most common cross-connections found.

**If your property has an in-ground irrigation system, it is your responsibility to make sure these steps are followed annually:**

1

Confirm that your irrigation system has an approved backflow prevention assembly.

2

Have the assembly tested by a certified tester and submit the report to the City of Coburg for property compliance recording.

Email to: [burke.hansen@ci.coburg.or.us](mailto:burke.hansen@ci.coburg.or.us) , mail to PO Box 8316, or drop off at City Hall.

*Check with your installer for auto-scheduling of your required annual test.*
